Drilling log
ICX-Fat Boys Ø 5.5mm

medentis medical

Ø 5.5mm D2/D3/D4

Drilling protocol
for very soft/soft/medium-
hard bone.

This procedure
is the same for all lengths.

The drilling protocol proposed by medentis medical is merely a recommendation.
As a general rule, for all drills, all implant diameters and all bone classes, the specified drilling sequence may vary.
The softer the bone, the fewer steps are recommended.
he harder the bone, the more intermediate steps are recommended.
