

Unleashing the Full Potential of All-on-X Workflows

HAT Scanbody-Kit

Easy to use, high precision, cost-effective

The HAT scan body is a newly developed solution from Panda Scanner—specifically designed for **eden-tulous implant cases**. Unlike conventional cylindrical scan bodies, the **HAT scan body** features a distinctive hexagonal shape for even greater precision.

HAT

Hexagonal, long shank, tapered

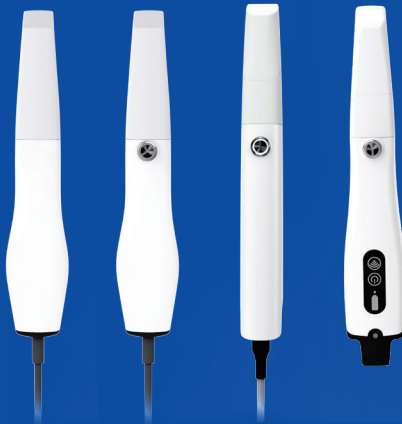

*The actual product may vary; the physical item is the final authority.
